

IMPROVE EFFICIENCIES — REDUCE COST

Whether you are a Parts Retailer, Distributor, Original Equipment Manufacturer or Fleet, your Parts Master Catalog is the backbone of your business. If the data isn't clean and streamlined, your efficiencies are at risk and so is your bottom line. MOTOR's PartSaver ensures optimal efficiencies and drives down unnecessary costs.

BUSINESS IMPACT

- Streamline parts purchasing, create a 15% increase in transaction efficiency
- Reduce inventory duplication, save an average 20% of total inventory costs
- Ease parts identification through standardized part descriptions, save time
- Improve supplier to manufacturer relationship

WHAT IS AVAILABLE

- VMRS Key Code 34 five-character manufacturer identification code applied for consistency
- VMRS Key Code 31-33: nine-digit coding to the component level (Group, assembly and Component)
- Validated Part Number with or without delimiter (your preference)
- Enhanced MOTOR Part Descriptions
- Overlap analysis by Manufacturer to reduce size of Master Catalog
- Parts validation that may include Alternate Vendor Part Numbers as the EXACT same part
- List of unverifiable items for customer to review and determine disposition
- Maintenance and hosting of the master price files with updates
- Assistance with national procurement agreements, by requested
- A part validation tool when adding to the Parts Master Catalog
